Hypnosis Show

Comedy Hypnosis Show

As a hypnotist can make for one unique and memorable experience that all will love. You have people getting involved, everyone laughing, and everyone loving this night more than they ever could otherwise. It is excitement and wonder rolled into one fantastic experience.

For a thearte, you need an experience that can leave people stunned and excited, something that they are going to remember. That is what I can give you with my stage hypnosis show. Everyone is coming together, having fun, and doing something that they will likely never do again. One of the best aspects of a hypnotist like mw is that it is not about doing small, simple, and rather boring things, like what you might expect. It is about getting everyone involved and doing something big, as big as the night itself. Large numbers of people participate and actually have an exciting night because of this.

Everyone is going to laugh through the entire show. This is something where the focus is on humor, on the participants, and having fun, and it truly shows. From the moment my hypnosis show starts and for every second after, you have smiles and laughter from everyone. It might seem like a small event, but the reaction is huge. Over and over again, people love the laughter and delight that a hypnotist brings. The event brings in a lot of cheers, people wanting to get up and get involved, and people wanting the show to go on for longer.

A hypnotist is a safe way to make the night fun, too. There are really no downsides here because the entire event is focused on humorous ways to play with hypnotism and willing participants. People go on stage, are hypnotized, and become part of a comedy show. They enjoy themselves and the audience laughs away. No one is harmed, no one is forced to take part, and no one comes away from this with a sense of dissatisfaction or the thought that it could have been better somehow.

FAQ

- Is your show 100% clean of profanity and inappropriate topics?

Yes my show is good, clean fun for everyone involved. (With that said I can't control what people will say and what comes out of their mouths)

- What activities will you require people to participate in while hypnotized?

Some activities will be more physical than others. The most physical thing I will have them do is dance around.

- How do you ensure that all embedded suggestions are removed after the show?

Once my show starts and the participants are under hypnosis they are now suggestible. I tell the participants "What I say and tell you will be your reality. Every breath you take will make you go deeper and deeper." Once the show comes to an end they are still suggestible so I put the participants under again by saying sleep and simply say "You will now be restored back to normal, Back to before the show started. All the suggestions you were given are gone." Because they are still in a hypnotic state this suggestion stays with them and thus they are restored back to how they were before the show started.

- Are there any dangers regarding hypnosis?

Before the show starts I give some warnings that people who are pregnant or have any joint pain should not participate in the show on stage. I also explain that hypnosis itself is not dangerous. Hypnosis is just a suggestible state of consciousness and a state of heightened awareness. Basically hypnosis puts your conscious mind into REM sleep and

your subconscious wakes up.

- Does your comedy show involve educating the audience about hypnosis?

Yes I educate everyone beforehand and during the show. I go over what hypnosis is, how it works, why it works on some and not others. I also discuss my background performing hypnosis.
